GLENVIEW NURSERIES

WHOLESALE CATALOG
1909

MARQUETTE BUILDING
CHICAGO

INTRODUCTORY

In preparing our price list for 1909, we have been careful to include only such varieties as we have actually in stock and in sizes named.

Frequent reference will be found to extra large specimens which we will be able to furnish. This affords an unusual opportunity to secure matured plants, by means of which *immediate results* may be obtained.

Our list is uncommonly large and contains more than 900 different varieties of trees, shrubs, vines, evergreens and old-fashioned perennials. Every one of these has been tested and found perfectly hardy in northern Illinois. We have in this manner been able to secure a large number of valuable additions to the sorts usually offered in the ordinary nursery.

We carry such a large variety because it enables us to fill all orders from our own stock, no matter how many varieties are specified—thus avoiding for our patrons the uncertainty and inconvenience of applying to several nurseries for portions of such orders.

Our nurseries occupy 150 acres of rich rolling farm land at Glen View, Ill., seventeen miles northwest of Chicago, a forty-five minute ride on the C., M. & St. P. R. R.

The land is kept thoroughly fertilized and carefully cultivated during the entire growing season.

We plant farther apart, fertilize more frequently, and transplant oftener than the average nursery because our business is founded on *quality*.

That is why we produce the very finest goods—plants that are more sturdy, larger and better shaped, with plumper branches and completer root systems than those offered by the ordinary

nursery and intended to sell in a price competition.

Persons who cannot call in person to make selection are assured that their orders by mail will receive prompt and careful attention. A large share of our business has been built up by mail, and this fact is the best evidence that we have always handled our mail order trade in a conscientious and thoroughly satisfactory manner.

The prices quoted in the following pages include delivery on cars at Glen View, but packing will be charged for at the actual cost of material used. Carload lots packed without charge.

We will furnish fifty plants of same size and kind at hundred rates—five at ten rates. In listing our stock, we have stated exact sizes and price for each size, thus making it convenient for the purchaser to choose the specimen that exactly meets his requirements.

For a reasonable additional charge we will plant and warrant all goods ordered from us. We will also design the scheme of planting, will arrange the grouping so as to secure the most harmonious effects and produce most pleasing contrasts of color and form. We send our expert gardeners to prepare the ground and plant the stock in a correct and scientific manner.

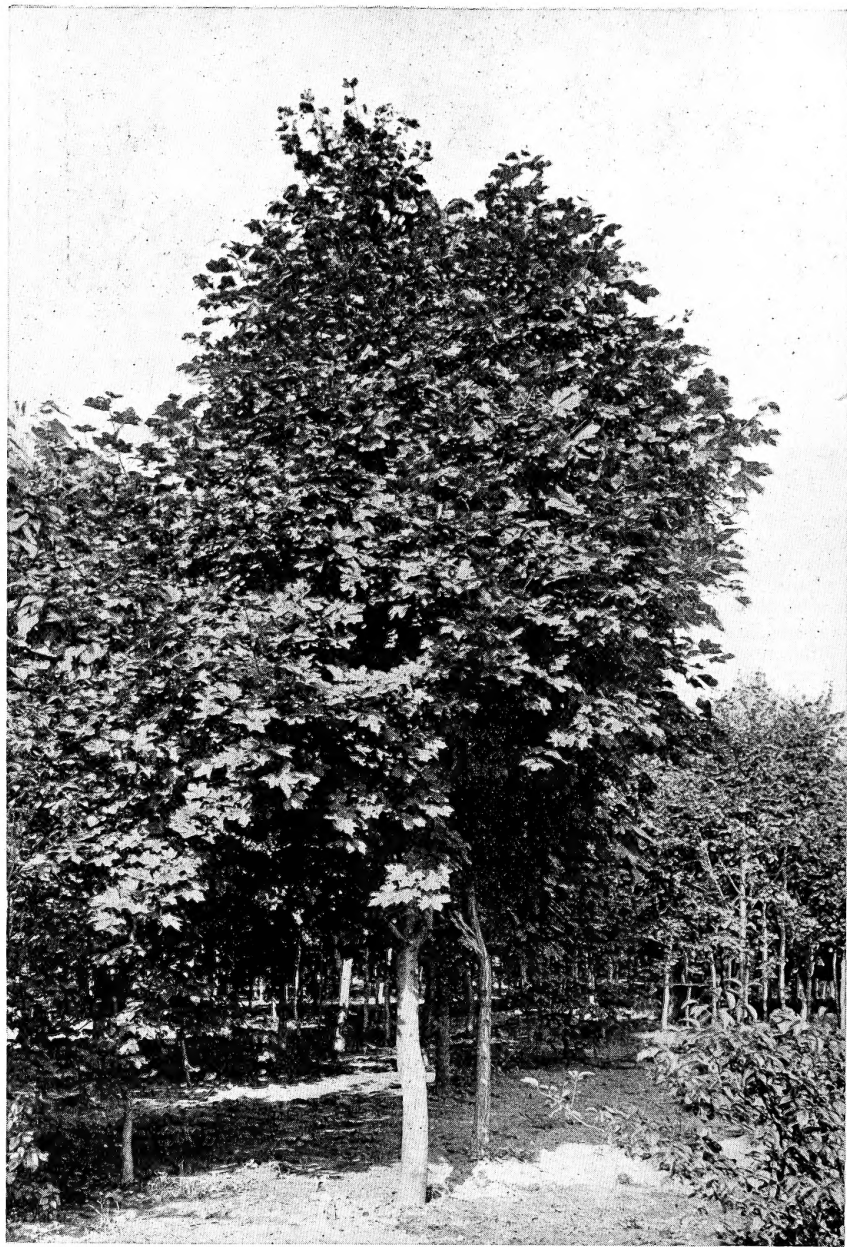

Our nursery is inspected annually by the State Entomologist, and a copy of the certificate of the last inspection is sent with each shipment.

We desire to thank those who have accorded us their patronage in the past and to assure them that any orders they may favor us with in the future will have close and prompt attention.

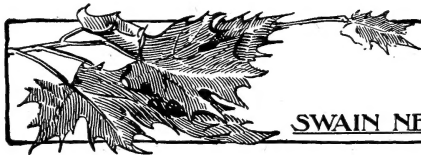

The experience, as well as reputation of Swain Nelson & Sons Company, covering two generations, is the purchaser's surest guarantee of good values and square treatment.
